- Vim Config: <https://github.com/thet/dotfiles-vim>

Survey via Twitter "What is your favorite code IDE/editor? Let me know"

Note

- Questions: <https://goo.gl/JU8qhk>
- Results: <https://goo.gl/1pkBYq>

Naked Vim is hardly usable

Note

- Load vim with different configuration `vim -u dot-vimrc`
- Show inserting, moving with cursors, etc.
- Use `set nocompatible` and do `:so %`. Now it's much better.
- Show "deleting in register" problem and "delete in blackhole register" solution.

Show fully configured vim

Note

- My vim config: <https://github.com/thet/dotfiles-vim>
- Good examples: <https://github.com/garbas/vim-config-garbas>
- Show `.vimrc`
- Show `config.vim`
- Show `keymap.vim`

Show plugins and functionality

Note

- Show `plugins.vim` and there individual plugins.
- Open plugin manager gx: <https://github.com/junegunn/vim-plug>

File Navigation

Note

- **Ctrl-P:**
 - `,/`, search for `autoformatdefaults`.
 - `,,` currently open files.
- File Beagle: `-`, a `netrw` alternative.
- Buffer Gator: `,m`
- Open Buffer in NERDTree: `,b`
- MiniMap: `mm`.

Linting and Formating

Note

- Ctrl-P, open `autoformatsample.js`
- Show errors and explanation.
- `,f`
- See result.
- `-` choose the python sample, format it with `,f`, `,i`, `,s`

Note

- External formatting tools
 - Choose `test.json` from root and do: `:%!python -m json.tool`
 - Choose `test.rst` from root and do: `:%!column -t`

Git

Note

- Show gut gutter on changed files.
- Jump from Hunk to Hunk `]c`.
- Undo a specific Hunk `,hu`
- Show `:Gitv` commit browser.
- Show `GDiff` diff viewer.
- Show Tagbar `tt` on Python file.

More

Note

- Show `:Goyo` with Limelight
- `colorscheme github, colorscheme molokai`

Show jedi-vim

Note

- `pythonpaths` part to build file with project paths:
<https://github.com/bluedynamics/buildout-base/blob/master/etc/dev.cfg>
- `python-config.vim` which parses this file.
- ask me if you're interested in this and need some help.

Tnx A Lot!
